EXPERIENCE

NexusCloud I.T Solution – OJT

FEBRUARY 2025 – APRIL 2025

Developed a company website with enrollment and payment systems using ReactJS and ExpressJS. Built and integrated RESTful APIs to the frontend, and created an admin dashboard for managing users and transactions.

EDUCATION

University of Rizal System

2021-2025

Bachelor of Science in Computer Science

Angono National Highschool

2015-2021

Humanities and Social Sciences

SKILLS

Python – Django, Flask, Numpy, Pandas, TKinter, BeautifulSoup, Unit Test, PyTest, PyGame

JavaScript – React, ExpressJs, React Native, NextJs, Axios, VueJs

PHP – Laravel, Pest, CodeIgniter

Miscellaneous – Git, GitHub, VS Code, Postman, InkScape, Microsoft PowerBi, Sass, TailwindCss, Bootstrap, Godot

Soft Skills:

- Time Management
- Communication
- Team Player
- Perseverance
- Adaptability

PROJECTS

Todo Task App

Developed a desktop-based Task Management App using Python and Tkinter, featuring a user-friendly interface for creating, updating, and deleting tasks. Integrated SQLite for persistent local storage, allowing users to track task status, set due dates, and manage tasks efficiently. This project strengthened my skills in GUI development, event-driven programming, and database integration.

Tic-Tac-Toe Web App

Built a Tic Tac Toe game using Next.js and TypeScript with interactive gameplay, state management, and responsive design. Implemented component-based architecture and utilized TypeScript for type safety and scalability.

Social Media Clone

Built a full-stack social media site clone using Django REST Framework for the backend and React for the frontend. The platform includes user authentication, post creation, likes, comments, and a dynamic news feed. This project deepened my experience in RESTful API development, JWT-based authentication, and integrating React with a Django backend.

Philippine E-Learning Module

Developed an educational platform for thesis, focused on Philippine history to promote engaging and interactive learning. Implemented user-friendly interfaces using HTML, CSS, and JavaScript, and managed backend functionalities and data storage with PHP and MySQL. Integrated AI-generated videos and images to enhance visual learning and comprehension. Designed and built interactive quizzes and mini-games to boost student engagement and knowledge retention.

Nexus Cloud Website

Express for the backend. Mostly tasked for doing the backend development of the program such as database management, API development and admin dashboard creation.
